“The best way to predict the future is to build it.” – Alan Kay

Education

DHBW, Duale Hochschule Baden-Württemberg

Mannheim, Germany

BACHELOR OF SCIENCE – BUSINESS INFORMATICS (FOCUS: DATA SCIENCE)

Jan. 2021 - Sep. 2024

COOPERATIVE PARTNER: TELEFÓNICA GERMANY GMBH & Co. OHG

- Designed and implemented a Blockchain Single Sign-On system as part of an innovation project
- Bachelor's thesis: "Using World Coin to develop a showcase for blockchain-based identity solutions in telecommunications"

Certifications

Alchemy University

Munich, Germany

EVM CHAIN CERTIFICATION

Mar. 2023

- Built and deployed a decentralized messaging application using Solidity and Hardhat, leveraging Polygon's EVM chain for fast, low-cost transaction processing and secure smart contract-based communication.

Makers of Tomorrow Germany

Munich, Germany

CERTIFICATE

Mar. 2023

- Participated in the Makers of Tomorrow entrepreneurship program and built an MVP and pitch deck for a startup concept introducing a unified global cryptocurrency to simplify international transactions

Skills

Tech Stack

Python · JavaScript · TypeScript · Solidity · React · Node.js · REST APIs · PostgreSQL · MongoDB · AWS · Docker · Kubernetes · Salesforce (Apex, LWC) · Smart Contracts (Hardhat, Polygon)

Languages

German (native), English

Work Experience

Telefónica Germany GmbH & Co. OHG

Mannheim, Germany

TECHNICAL DEVELOPER

Jan. 2021 - Today

- Developed and customized Salesforce pages and Lightning Web Components (LWC/Aura) to improve usability and streamline user interactions for internal teams.
- Architected a scalable, modular Salesforce solution integrating external order data pipelines via RESTful APIs, significantly accelerating B2B order processing workflows

CS Development

Munich, Germany

FOUNDER

Mar. 2019 - Aug. 2021

- Founded and operated a digital solutions startup, providing full-stack website development and SEO consulting for clients across various industries, increasing their digital reach and user engagement.

Giesecke+Devrient

Munich, Germany

INTERNSHIP

Sep. 2019 - Mar. 2020

- Engineered a cross-platform GUI tool in Python, enabling technical staff to install OS builds on secure microchips with standardized configuration workflows.

Avast

London, United Kingdom

INTERNSHIP

Aug. 2018 - Sep. 2018

- Implemented a secure login system with JWT authentication and a reliable database backend, ensuring secure user data management and protection against common attack vectors.
